July 20, 2018

Dr. Kristine McDuffy, Superintendent
Mrs. Ann McMurray, President, Edmonds School District
20420 68th Avenue West
Lynnwood, Washington 98036

Dear Dr. McDuffy & Mrs. McMurray,

Thank you for your letter and supporting information regarding the current status of the proposal for the Madrona School stormwater system. We have completed a review of the information and appreciate the District's willingness to go above and beyond the basic rule requirements to help ensure the protection of the aquifer.

We agree your proposal meets all the rule requirements and the additional and ongoing monitoring plans will help ensure the protection of the aquifer. These measures are consistent with the concepts we are discussing with the Department of Ecology for future changes to the UIC rules and guidance. This addresses the concerns previously cited by our department.

We may have some recommendations to consider for the proposed monitoring that could save some cost to the school district. If you are interested in our review and support of your final monitoring plan to ensure you are sampling only what is needed and not duplicating samples we would be happy to provide technical assistance.

As we discussed, the letter sent on April 19, 2018 from Garin Schrieve was intended to highlight potential impacts to the aquifer and is not an endorsement to refuse service. You have successfully addressed the concerns in that letter with your follow-up actions and proposed implementation and monitoring.

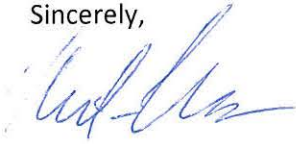

Please feel free to contact me at (360) 236-3178 or mike.means@doh.wa.gov if you have any questions.

Dr. Kristine McDuffy & Mrs. Anne McMurray
